

Tyrone Chen

PHD STUDENT · BIOINFORMATICS AND COMPUTATIONAL BIOLOGY

Melbourne, VIC, Australia

✉ chen.tyrone91@gmail.com |  <http://orcid.org/0000-0002-9207-0385> |  tyronechen |  tyronechen |  tyronechen91
tyrone-chen |  @_tyronechen |  tyronechen91

Education

Monash University

Melbourne, Australia

PHD STUDENT (BIOINFORMATICS)

2019 - 2022

- Project title: Identification of biological signals by combining distinct categories of biological data through machine learning.

Australian National University

Canberra, Australia

BACHELOR OF SCIENCE (MOLECULAR BIOLOGY AND PLANT SCIENCE); HONS. (BIOINFORMATICS)

2010 - 2013

Research Experience

Bioinformatics lab, School of Biological Sciences, Faculty of Science, Monash University (Dr Sonika Tyagi)

Melbourne, Australia

PHD STUDENT (BIOINFORMATICS)

2019 - PRESENT

- Applying machine learning to integrate biological data across multiple modalities.
- Large scale data (1-10 TB) analysis.
- Contributed to writing and data analysis for peer-reviewed academic publications.
- Open source software development for biological data analysis.

Stemformatics Project, Australian Institute for Bioengineering and Nanotechnology, University of Queensland; Centre for Stem Cell Systems, Department of Anatomy and Neuroscience, University of Melbourne (Prof. Christine Wells)

Brisbane and Melbourne, Australia

RESEARCH ASSISTANT (BIOINFORMATICS)

2014-2016; 2016 - 2019

- Curated and ran large quantities of microarray, high throughput sequencing and single cell data through pipelines on high performance compute clusters to contribute to a database of interest for both internal and external collaborators.
- Large scale data (1-10 TB) and metadata standardisation/management as well as retrieving and transmitting these in an accessible format to requesters.
- Contributed to data analysis for peer-reviewed academic publications.
- Open source software development for microarray and high throughput sequencing pipelines.

John Curtin School of Medical Research, Australian National University (Prof. Gavin Huttley)

Canberra, Australia

HONOURS SCHOLAR (BIOINFORMATICS)

2013

- Honours project on the development of a computational motif discovery toolkit for identification of signals in biological data.
- Implemented an algorithm in python using information theory and numerical optimisation to discover contiguous and discontiguous signals in biological sequence data.

Research School of Biology, Australian National University (Prof. Murray Badger)

Canberra, Australia

SUMMER RESEARCH STUDENT (PLANT BIOLOGY, MICROSCOPY)

2012 - 2013

- Carried out a systematic analysis of physiology of the land plant *Hirschfeldia incana* to identify the principles underlying its relatively high photosynthetic rate compared to closely related plants in its family.
- Performed plant growth under controlled conditions and conducted subsequent physiological measurements including microscopy as well as associated imaging and leaf gas exchange measurements.

Research School of Biology, Australian National University (Dr. Iain Searle)

Canberra, Australia

UNDERGRADUATE RESEARCH STUDENT (MOLECULAR BIOLOGY, PLANT BIOLOGY)

2012

- Investigated the possible effect of mutations in the small RNA silencing mechanism which might contribute to genomic instability.
- Performed sterile plant and bacterial growth, PCR, transformation and gel electrophoresis, antibiotic screens, RNAase digestion, DNA extraction and media preparation.

Teaching Experience

Monash University

Melbourne, Australia

DATA FLUENCY ASSOCIATE INSTRUCTOR

2019-PRESENT

- Running software carpentry sessions in unix shell, github, python, R, high performance computing cluster usage and deep learning.

- Facilitated learning among undergraduate biology students by running tutoring sessions and designing exercises.

Other Experience

TraffixGroup

Melbourne, Australia

SUPERVISOR (TRAM SURVEYOR)

2014

- Led a team to count and interview passengers across Melbourne's tram routes.

Research School of Biology, Australian National University

Canberra, Australia

LABORATORY TECHNICIAN

2012

- Maintained a molecular biology laboratory focused on non-coding RNA in plants.

Honours & Awards

AUSTRALIA

Australian Government Research Training Program Scholarship

2019-2022 Australian Government Research Training Program Scholarship to pursue full-time candidature in the Doctor of Philosophy (PhD) with the School of Biological Sciences, Monash University. Canberra, Australia

Faculty of Science Dean's Postgraduate Research Scholarship

2019-2022 Faculty of Science Dean's Postgraduate Research Scholarship to pursue full-time candidature in the Doctor of Philosophy (PhD) with the School of Biological Sciences, Monash University. Melbourne, Australia

Data Fluency Digital Toolkit Poster Competition 2019 prize

2019 Awarded a prize for an oral presentation and associated poster presented as part of the Data Fluency Digital Toolkit Poster Competition 2019 held in Monash University. Melbourne, Australia

USA

Sponsored Membership

2013-2015 American Association for the Advancement of Science (Science Program for Excellence in Science) Washington, DC, USA

Skills

COMPUTATIONAL

- Machine learning: pytorch and tensorflow
- Languages and markup: python, R, bash, pSQL, LaTeX, restructured text
- Version control: git, mercurial
- Virtual environment management: conda, virtualenv, pip
- Usage of high performance compute clusters and associated job submissions: PBS, SGE, slurm
- Efficient management, organisation, archival, retrieval and standardisation of large quantities of data and metadata (1-10TB) per dataset
- Reproducible research practices and documentation: jupyter notebooks, Rmarkdown
- Workflow languages: Snakemake and Nextflow
- Graphic design for posters and scientific articles: Adobe InDesign, Adobe Illustrator [example poster available online](#)

BIOINFORMATICS, MATHEMATICS AND STATISTICS

- Data visualisation: PCA, interactive plots, genome browsers
- Differential gene expression analyses: ANOVA, pairwise t-tests
- Information theory: mutual information, relative entropy
- Signal processing: Fourier transform, autocorrelation
- Numerical optimisation: simulated annealing
- Motif enrichment analyses: ISMARA, MEME suite
- Batch effect correction: limma, ComBAT, supervised normalisation

BIOLOGY

- Microscopy: light microscopy and associated sample preparation
- Plant physiology: Leaf gas exchange measurements, Membrane inlet mass spectrometry, fieldwork, plant growth
- Molecular biology: PCR, Molecular cloning, bacterial transformation, antibiotic screens, gel electrophoresis, RNAase digestion, DNA extraction, sterile plant growth, media preparation

OTHER

- Teaching and training: usage of microarray and high throughput sequencing pipelines, introduction to programming (python, R, unix shell, HPC), github, deep learning, peer mentoring for undergraduate biology students
- Project management and task organisation
- Awareness of cultural and professional diversity and clear communication
- Social media editor [[Stemformatics Project twitter](#)], [[Monash Computational Biology lab twitter](#)]

Professional Development

SOCIETY MEMBERSHIPS

- [Software carpentries](#) instructor - 2020-present.
- Professional membership with the Australasian Genomic Technologies Association (AGTA) - 2014-2015.
- Professional membership with the Australian Bioinformatics And Computational Biology Society (ABACBS) - 2014-present.
- Sponsored membership with the American Association for the Advancement of Science (Science Program for Excellence in Science) - 2013-2015.
- Professional membership with the Institute of Electrical and Electronics Engineers (IEEE) - 2013-present.

VOLUNTEER EXPERIENCE

- Workshop assistance at the [Introduction to Python workshop](#), 28th March, 2019, Monash University, Clayton, Australia.
- Community outreach with visiting students at the University of Melbourne (2016), University of Queensland (2014) and Australian National University (2013)

CONTRIBUTIONS TO OPEN SOURCE SOFTWARE LIBRARIES

- MONET multi-omics clustering algorithm. [git repository](#)
- Modules for use with the s4m shell framework used in the Stemformatics project. [git repository](#)
- The extra tools needed to run the Stemformatics project and add datasets into it. [git repository](#)
- Software carpentries lesson material. [git repository](#)

CONFERENCE AND WORKSHOP ATTENDANCE

- Conference presentation at the 28th International Conference on Intelligent Systems for Molecular Biology (ISMB), 13-16th July, 2020*
- Conference presentation at the Bioinformatics Open Source Conference (BOSC 2020), 20-23rd July, 2020*
- Conference presentation at the Australian Bioinformatics and Computational Biology Conference, 9-11th December, 2019, University of Sydney, Sydney, Australia.
- Conference presentation at the Australian Bioinformatics and Computational Biology Conference, 26-29th November, 2018, University of Melbourne, Melbourne, Australia.
- Conference presentation at the Single Cell Genomics Conference, 14-16th September, 2016, Wellcome Genome Campus Conference Centre, Cambridge, United Kingdom.
- Workshop attendance at the QFAB RNA-Sequencing workshop, 19-20th November, 2014, Queensland Biosciences Precinct, University of Queensland, Australia.
- Conference presentation at the Australasian Genomic Technologies Association 14th Annual Conference (AGTA), 13-15th October, 2014, Crown Promenade Hotel, Melbourne, Australia.
- * *virtual participation due to the COVID-19 pandemic of 2020*

Publications

JOURNAL ARTICLES

- 2020 Paul W Angel, Nadia Rajab, Yidi Deng, Chris M Pacheco, **Tyrone Chen**, Kim-Anh Lê Cao, Jarny Choi, Christine A Wells. A simple, scalable approach to building a cross-platform transcriptome atlas *PLOS Computational Biology*. doi: 10.1101/2020.03.09.984468 [Link](#)
